LINN COUNTY EXPO CENTER

Facility Activity Report February 2024

About our facility

From a distance, dramatic white peaks suspended above the entrance to the Linn County Expo Center resemble the grace of the Cascade Range. It's a striking visual reference to the Willamette Valley and the Pacific Northwest.

At the center of it all is the Linn County Expo Center. With over 157,000 square feet of versatile convention and exhibit space, this flexible modern meeting facility in Albany, Oregon was designed to host an array of meetings, conventions and exhibitions. We are a showplace in the valley with a heart for agriculture and livestock. With easy access off I-5, adjacent hotels and restaurants, we make event planning simple.

Willamette Conference Center

With over 6,000 square feet of versatile conference space, the Willamette Conference Center boasts both modern and high-tech amenities, from free wireless internet and state of the art audio and video equipment to an attached commercial kitchen, all designed to make you stand out from the crowd.

LINN COUNTY BOARD OF COMMISSIONERS HEARING STAFF REPORT

PREPARED BY: Alyssa Boles, Planning Manager

DATE ISSUED: March 12, 2024

HEARING DATE: March 19, 2024

APPLICATION: **PD23-0743**: an application by Talon Henness for a Comprehensive Plan Map amendment and Zoning Map amendment on a 1.00-acre property identified as Tax Lot 401 on map T10S, R03E, Section 00. The applicant proposes to amend the Plan designation from Forest Resource to Farm/Forest and the Zoning map designation from Forest Conservation Management (FCM) to Farm/Forest (F/F).

PLAN / ZONE: Forest Resource / Forest Conservation Management (FCM)

LOCATION: The property is located on the south side of Pebble Drive, approximately 0.25 miles east of the intersection of Pebble Drive and Rock Creek Road, and approximately 1.79 miles southeast of the city of Mill City.

CRITERIA: Linn County Land Development Code (LCC) 921.822(A) and 921.874 and Oregon Administrative Rules (OAR) 660-006-0057 contain the applicable decision criteria.

I. INTRODUCTION

A. APPLICATION SUMMARY

Talon Henness (Applicant) is proposing to change the Comprehensive Plan Map designation and *Zoning Map* designation on a 1.00-acre property from Forest Conservation Management (FCM) to Farm Forest (F/F). The subject property is identified on Linn County Assessor maps as T10S, R03E, Section 00, Tax Lot 401. The property is located on the south side of Pebble Drive, approximately 0.25 miles east of the intersection of Pebble Drive and Rock Creek Road, and approximately 1.79 miles southeast of the city of Mill City.

The *Comprehensive Plan (Plan)* designation of the property is Forest Resource. Statewide Planning Goal 4 currently applies to the subject property. Goals 3 and 4 apply to properties with a Farm/Forest Plan and zoning designation; therefore, the proposed amendments do not require an exception to Statewide Planning Goal 3 or Goal 4.

The application indicates that the purpose of the zoning map amendment is to be able to timber the property. The application indicates that the applicant may want to build a dwelling on the property at some point. The F/F zoning district does not allow for a dwelling as an outright use. An application for a dwelling would have to meet the applicable criteria contained in Linn County Code. This zoning map amendment does not authorize the placement of a dwelling on the subject property.

The applicant must provide evidence that the proposal is consistent with the decision criteria, including all applicable Comprehensive Plan policies. The application is attached to this report as **Exhibit A**.

B. PLANNING COMMISSION RECOMMENDATION

The Planning Commission (Commission) will hold a public hearing on this matter at 7:00 p.m., March 12, 2024. The Commission will vote on a recommendation to the Board regarding this matter at the hearing. The Board is scheduled to conduct a public hearing on this matter at 10:00 a.m., Tuesday, March 19, 2024. The Commission recommendation will be available at the Board hearing.

C. DECISION CRITERIA AND ANALYSIS

The applicable decision criteria are contained in LCC Sections 921.822(A) and 921.874 and Oregon Administrative Rules (OAR) 660-006-0057. The decision criteria are attached to this report as **Exhibit B**.

LCC 921.822 Decision criteria for Zoning Map amendments

(A) When a Zoning Map or Land Development Code text amendment is necessary due to a proposed *Comprehensive Plan* amendment, only findings and conclusions responding to the *Comprehensive Plan* amendment criteria for decision are necessary to amend the Zoning Map or Code text provisions.

STAFF ANALYSIS: Both a Zoning map amendment and a *Plan* map amendment are proposed with this application. The *Plan* amendment criteria described in 921.874 are addressed above. Compliance with the *Plan* Amendment criteria satisfies this criterion.

LCC 921.874(A) - Decision criteria for Plan map amendments

(A) To approve a Plan map amendment, findings shall be made that:

(1) The amendment is consistent with and does not alter the intent of applicable section (s) of the Comprehensive Plan;

STAFF ANALYSIS: The following policies in the Land Use Element (Chapter 905) of the Comprehensive Plan apply to the proposed amendments:

LCC 905.220(B) (Policies for forest resource lands):

(B) Forest Resource lands will be kept in large tracts to ensure forestry can occur and the land is being used for its intended purposes. The minimum lot size is set by statute to ensure the land base continues to be suitable for forestry production. The partition and property line adjustment sections of the LCC establish standards for reducing the size of a parcel and creating new parcels.

The subject property is not consistent with this policy because it is one acre in size and is not large enough to support commercial forestry production.

LCC 905.300(D - E) (Farm/Forest lands; background)

(D) Given that the Farm/Forest designation is a hybrid of agriculture and forestry uses, Statewide Planning Goals 3 and 4 apply to these lands. Farm/Forest lands aim to preserve and maintain agricultural and forest lands and to conserve soil, water, air and wildlife resources. Resource land uses permitted in both the EFU and the FCM zones are allowed in the Farm/Forest zone given the same regulations that exist in the other resource zones. Uses permitted conditionally in either the Agricultural or Forest Resource plan designation are also permitted conditionally in the Farm/Forest zone under similar regulations.

The F/F zoning district supports uses similar to the current FCM zoning designation. Either farm or forest uses are suitable on this property given its location and topography. LCC 905.300(E) identifies the foothills of Linn County as the primary location of Farm/Forest zoning. Linn County Geographic Information System (GIS) maps indicate the subject property is located in the foothills of the County. Under LCC 905.300(B), typical land uses in the Farm/Forest area include farming, livestock grazing and small scale-timber operations. The topographical features, soil and natural features of the subject property are consistent with the provisions described in LCC 905.300 (Farm/Forest Background).

The existing zoning on the south side of Pebble Drive is Forest Conservation Management (FCM). The existing zoning on the north side of Pebble Drive transitions west to east from Rural Residential to Exclusive Farm Use. The existing land use pattern in the area transitions from dwellings and forest land in the west to small scale timber processing and less intensive farm uses in the surrounding FCM and EFU zoned areas, to state and federally managed forest land in the FCM zoned areas surrounding the subject property. Linn County GIS aerial photography indicates that the historic land use pattern in the area is a mix of agricultural and forest uses, adjacent to some low density residential areas containing small scale hobby farms. The application indicates that the purpose of the zoning map amendment is to be able to timber the property. The proposed small-scale timber operation appears to be consistent with surrounding land uses in the area.

(E) The Farm/Forest lands of Linn County are located primarily in the foothills of Linn County while the EFU and the FCM lands are typically concentrated in the western and eastern areas of the county respectively. Though Farm/Forest lands are a hybrid of the other two resource designations of the Comprehensive Plan, the nature of Farm/Forest lands makes regulation of them different and perhaps more difficult than the other zones. The mixed-use Farm/Forest zone is characterized by smaller parcel sizes and more residential development. Though there is an eighty-acre minimum size for new properties in the Farm/Forest designation, many properties were created at a smaller size under previous zoning laws or prior to the initiation of zoning laws.

The subject property is more aligned with this policy, rather than LCC 905.220(B). It is a small acreage property adjacent to residential development.

(2) The amendment will be compatible with adjacent uses and will not adversely impact the overall land use pattern in the area;

FACTS: Linn County GIS maps indicate the subject property is contiguous to properties with a Forest Conservation Management zoning designation to the south, west, and east and contiguous to properties with a Rural Residential and Exclusive Farm Use zoning designation to the north.

STAFF ANALYSIS: The application states that the proposed zoning designation would be consistent with surrounding properties. The proposed F/F zoning designation would provide for both farm and forest uses. The topographical features, soil and natural features of the subject property are consistent with the provisions described in LCC 905.300 (Farm/Forest Background).

The F/F zoning district also supports uses similar to the current FCM zoning designation. Either farm or forest uses are suitable on this property given its location and topography. LCC 905.300(E) identifies the foothills of Linn County as the primary location of Farm/Forest zoning. Linn County Geographic Information System (GIS) maps indicate the subject property is located in the foothills of the County. Under LCC 905.300(B), typical land uses in the Farm/Forest area include farming, livestock grazing and small scale-timber operations.

The existing zoning in the area from west to east is Forest Conservation Management (FCM). The existing zoning north of the property from west to east transitions from Rural Residential to Exclusive Farm Use. The existing land use pattern in the area transitions west to east from dwellings and privately managed timber land and farm fields to commercial timber operations in the FCM zoned areas south and east of the property.

Notice was sent to surrounding property owners within 1,000 feet of the subject property. No comments were submitted indicating any adverse impacts to the land use pattern in the area a result of the proposed amendments.

The proposed zoning map amendment does not authorize specific development. Any proposed future development would be subject to a land use review and criteria to determine if there are impacts to surrounding farm and forest uses, as well as determine whether any proposed development will have any adverse impacts on the overall land use pattern in the area.

- (3) The amendment, if within an adopted urban growth boundary, is in substantial conformity with the *Comprehensive Plan* and implementing ordinances of an affected city;**

STAFF ANALYSIS: The subject property is not located within an urban growth boundary; therefore, this criterion is not applicable.

- (4) The amendment will not have a significant adverse impact on a sensitive fish or wildlife habitat;**

FACTS: The property is located within an inventoried peripheral big game habitat area. The property does not contain any inventoried sensitive fish or riparian habitat. There is an inventoried wetland on the property.

STAFF ANALYSIS: The subject property is located within a peripheral big game habitat area (**Exhibit C**). The property is located within Section 00 of T10S, R1E, in Linn County, Oregon. The section (Section 00) is developed with one existing dwelling. Pursuant to LCC 903.510(B)(2), Section 26 is not "impacted".

There are no sensitive fish or riparian habitats on the property. Oregon Department of Fish and Wildlife was notified of the proposed amendments submitted comments stating that the amendments could result in a possible dwelling or structures on the property, which could have potential impacts to wildlife habitat (**Exhibit D, pages 5-6**).

The amendment applications, if approved, do not grant dwelling approval. If a dwelling or structure is proposed in the future, pursuant to LCC 903.510(B)(10) (Policies for fish and wildlife areas and habitat), clustering techniques (for new dwellings) shall be used to implement the ODFW acceptable density standard in the major and peripheral game ranges. Clustering means all of the following as applicable to the situation: (a) Locating dwellings and structures near each other and existing roads; (b) Locating dwellings and structures to avoid habitat conflicts and utilize least valuable habitat areas; and (c) Minimize road development to that necessary to support the residential use. Future development within the peripheral big game habitat area is required to comply with the clustering techniques described in the *Plan*.

Surrounding lands to the east, west, and south are zoned Forest Conservation management, which does not permit a dwelling. The surrounding lands are primarily state and federally managed forest land. Development within the section is limited by the zoning district. Aerial imagery indicates that the surrounding lands have historically been managed for timber production or forest preservation.

- (5) The amendment will not have a significant adverse impact upon the provision of public facilities including police and fire protection, sanitary facilities and storm drainage facilities;**

FACTS: The property is located within the Gates Rural Fire Protection District. The subject property is served by the Linn County Sheriff's Office. The property does not contain a septic system.

STAFF ANALYSIS: The subject property is located within the Gates Rural Fire Protection District. The Linn County Sheriff's Department received notice of the application and did submit comments expressing any concern as a result of the proposed amendments.

If the property were to be developed at a future date, Linn County Code requires compliance with LCC 934.590 (F/F (forest area) and FCM zoning district structural siting standards). The provisions in LCC 934.590 require that the property be either: (1) located within a fire protection district, (2) shall be provided with structural fire protection by contract, or (3) provide an alternative means for protecting the structure from fire hazards, such as sprinkling systems or on-site water storage.

Septic suitability is generally not factors in determining whether the property is appropriate for an F/F Plan and zoning designation. Linn County Environmental Health Program did not submit comments indicate impacts regarding septic suitability as a result of the proposed amendments. The applicant submitted septic records for surrounding properties to demonstrate septic suitability within the area.

The proposed zoning map amendment does not authorize specific development. Any proposed future development would be subject to a land use review and criteria to determine if there are impacts to transportation facilities, police and fire protection, storm drainage facilities or other regional public facilities.

(6) The amendment will not have a significant adverse impact upon the transportation facilities;

FACTS: The property has access of Pebble Drive, a County maintained right of way.

STAFF ANALYSIS: The property has access via Pebble Drive, a County maintained right of way. The Linn County Road Department was notified of the application and did not express concern regarding the proposed amendments (**Exhibit D, pages 1-2**). The Road Department comments did not indicate any significant adverse impacts to the existing road network as a result of the proposed amendments.

(7) The presence of any development limitations including geologic hazards, flood hazards or water quality or quantity will not have a significant adverse affect on land uses permitted through the amendment;

FACTS: The property is not located within a mapped geologic hazard area or within the special flood hazard area. The property does not contain a septic system or well.

STAFF ANALYSIS: The subject property is not within a designated flood hazard area. The property is not identified as being within an identified area subject to mass movement topography, as inventoried in the Environmental Geology of Western Linn County, Oregon (DOGAMI, 1974).

Water availability and water quality are generally not factors in determining whether the property is appropriate for an F/F Plan and zoning designation. The applicant also submitted well logs for surrounding properties to demonstrate water availability within the area.

(8) An exception to the statewide planning goals is not required. If required, then findings have been prepared to meet the exception criteria; and

STAFF ANALYSIS: The property currently has a Plan designation of Forest Resource and a zoning designation of Forest Conservation Management (FCM). The proposed amendments would result in a Plan designation and zoning designation of Farm/Forest.

The Farm/Forest designation is a hybrid of agriculture and forestry uses, Statewide Planning Goals 3 and 4 apply to these lands. Farm/Forest lands aim to preserve and maintain agricultural and forest lands and to conserve soil, water, air and wildlife resources. Resource land uses permitted in both the EFU and the FCM zones are allowed in the Farm/Forest zone given the same regulations that exist in the other resource zones. Uses permitted conditionally in either the Agricultural or Forest Resource plan designation are also permitted conditionally in the Farm/Forest zone under similar regulations.

As determined in LCC 921.874(A)(9) below, the application is consistent with the statewide planning goals; therefore, a goal exception is not required.

(9) The amendment is consistent with the statewide planning goals.

STAFF ANALYSIS:

Goal 1: Citizen Involvement. The proposal will be reviewed during public hearings before the Linn County Planning Commission and the Linn County Board of Commissioners. The hearings will provide opportunity for citizen involvement. Notice of the hearings was provided to surrounding landowners and affected agencies in the manner specified in the Linn County Code and State law. Property owners within 1,000 feet of the subject properties and affected public agencies were provided written notice.

Goal 2: Land Use Planning. Linn County has an acknowledged Comprehensive Plan and implementing Code. The Plan and Code establish procedures to amend the Linn County Comprehensive Plan and zoning maps. The Planning and Building Department has determined the application is complete and in compliance with Chapter 921 of the Linn County Code, as demonstrated in this staff report.

Goal 3: Agricultural Lands. The subject property will be designated on the Comprehensive Plan as Farm/Forest and will have a zoning designation of Farm/Forest (F/F). The Farm/Forest designation is a hybrid of agriculture and forestry uses, Statewide Planning Goals 3 and 4 apply to these lands. Farm/Forest lands aim to preserve and maintain agricultural and forest lands and to conserve soil, water, air and wildlife resources.

Goal 4: Forest Lands. The subject property will be designated on the Comprehensive Plan as Farm/Forest and will have a zoning designation of Farm/Forest (F/F). The Farm/Forest designation is a hybrid of agriculture and forestry uses, Statewide Planning Goals 3 and 4 apply to these lands. Farm/Forest lands aim to preserve and maintain agricultural and forest lands and to conserve soil, water, air and wildlife resources.

Goal 5: Open Spaces, Scenic and Historic Areas and Natural Resources. Goal 5 requires that the County protect natural resources and lists riparian areas, fish and wildlife habitats, wetlands, mineral and aggregate sites, and scenic waterways, among other resources, as protected by Goal 5. The subject property is located within the peripheral big game habitat area.

Policies in the Linn County Comprehensive Plan, as well as criteria and development standards in the Linn County Code are adopted to minimize impacts to protected Goal 5 resources. These same processes are also in place to ensure that proposed development

within the County is reviewed in accordance with applicable local, state, and federal regulations to protect these same resources.

Goal 6: Air, Water and Land Resources Quality. The proposed amendments do not necessarily impact air, water, or land resources quality. Generally, this type of impact is reviewed at the time a development permit is submitted to the Department. Local, state, and federal agencies are notified of proposed development on a particular property during the land use review process. All local, state, and federal requirements put in place to mitigate any potential concerns regarding air, water or land resource quality must be satisfied before site development permits can be issued.

Goal 7: Areas Subject to Natural Disasters and Hazards. There are no areas subject to Natural Disasters and Hazards identified on the site. Therefore, Planning Goal 7 does not apply to this amendment.

Goal 8: Recreational Needs. Goal 8 requires the County to plan for the recreation needs of their residents and visitors. The subject property is privately owned land and is not planned for public recreational needs. Goal 8 does not apply to the proposed *Plan* and zoning map amendment.

Goal 9: Economic Development. The subject property has historically and currently been actively farmed and timbered, which provides economic opportunity for local farmers within Linn County and the potential for economic growth within the local agricultural area.

Goal 10: Housing. Goal 10 requires jurisdictions with buildable lands in urban and urbanizable areas to be inventoried and comprehensive plans shall encourage the availability of adequate numbers of needed housing units. The property is not urban or urbanizable land, therefore Goal 10 does not apply.

Goal 11: Public Facilities and Services. Goal 11 allows for planning and development of a timely, orderly and efficient arrangement of public facilities and services to serve as a framework for urban and rural development. The applicant is not proposing to establish a public facility as a result of the proposed amendments. This goal is not applicable.

Goal 12: Transportation. The Linn County Road Department was notified of the proposed map amendments and did not indicate the requirement for a transportation analysis. The Road Department comments did not indicate significant adverse impacts to the existing road network as a result of the proposed amendments.

Goal 13: Energy Conservation. Goal 13 encourages communities to look within existing urban neighborhoods for areas of potential redevelopment before looking to expand, to "recycle and re-use vacant land." The goal also directs the County to have systems and incentives in place for recycling programs. Goal 13 does not apply to the proposed *Plan* and zoning map amendment.

Goal 14: Urbanization. The subject properties are not proposed or available for urbanization. Goal 14 does not apply to this amendment.

Goal 15: Willamette River Greenway. The subject property is not located within the Willamette River Greenway. Goal 15 does not apply to this application.

Goal 16: Estuarine Resources; Goal 17: Coastal Resources; Goal 18: Beaches and Dunes. Linn County does not have any estuaries, coastal shorelines, beaches or dunes. Goals 16, 17, and 18 do not apply in Linn County.

OAR 660-006-0057 Rezoning Land to an Agriculture/Forest Zone

Any rezoning or plan map amendment of lands from an acknowledged zone or plan designation to an agriculture/forest zone requires a demonstration that each area being rezoned or replanned contains such a mixture of agriculture and forest uses that neither Goal 3 nor 4 can be applied alone.

FACTS: Linn County GIS maps indicate the subject property is contiguous to properties with a Forest Resource Management zoning designation to the west, east, and south. The properties directly to the north of the subject property are zoned Rural Residential and Exclusive Farm Use.

STAFF ANALYSIS: The application states that the proposed zoning designation would be consistent with surrounding properties. The subject property is proposed to have a *Plan* designation of Farm/Forest. LCC 905.300(D) of the *Plan* states,

"Given that the Farm/Forest designation is a hybrid of agriculture and forestry uses, Statewide Planning Goals 3 and 4 apply to these lands. Farm/Forest lands aim to preserve and maintain agricultural and forest lands and to conserve soil, water, air and wildlife resources. Resource land uses permitted in both the EFU and the FCM zones are allowed in the Farm/Forest zone given the same regulations that exist in the other resource zones. Uses permitted conditionally in either the Agricultural or Forest Resource plan designation are also permitted conditionally in the Farm/Forest zone under similar regulations."

The F/F zoning district supports uses similar to the current FCM zoning designation. Either farm or forest uses are suitable on this property given its location and topography. LCC 905.300(E) identifies the foothills of Linn County as the primary location of Farm/Forest zoning. Linn County Geographic Information System (GIS) maps indicate the subject property is located in the foothills of the County. Under LCC 905.300(B), typical land uses in the Farm/Forest area include farming, livestock grazing and small scale-timber operations. The topographical features, soil and natural features of the subject property are consistent with the provisions described in LCC 905.300 (Farm/Forest Background).

The existing zoning on the south side of Pebble Drive is Forest Conservation Management (FCM). The existing zoning on the north side of Pebble Drive transitions west to east from Rural Residential to Exclusive Farm Use. The existing land use pattern in the area transitions from dwellings and forest land in the west to small scale timber processing and less intensive farm uses in the surrounding FCM and EFU zoned areas, to state and federally managed forest land in the FCM zoned areas surrounding the subject property. Linn County GIS aerial photography indicates that the historic land use pattern in the area is a mix of agricultural and forest uses, adjacent to some low density residential areas containing small scale hobby farms. The application indicates that the purpose of the zoning map amendment is to be able to timber the property. The proposed small-scale timber operation appears to be consistent with surrounding land uses in the area.

D. EXISTING AND PROPOSED CONDITIONS

CONDITION	EXISTING	PROPOSED
Plan Designation	Forest Resource	Farm/Forest
Zone Designation	Forest Conservation Management (FCM)	Farm/Forest (F/F)
Site Location	T10S, R03E, Section 00, Tax Lot 401	Same

E. ZONING AND DEVELOPMENT BACKGROUND

The subject property has been zoned Exclusive Farm Forest Resource Management since September 2, 1980. The property was zoned Timber Conservation (TC) prior to September 2, 1980. No development permits or land use files are associated with the subject property.

II. PROPERTY CHARACTERISTICS

B. PROCEDURE

The Planning Commission (Commission) will conduct a public hearing to review the application and will make a **recommendation** to the Linn County Board of Commissioners (Board).

The Board is scheduled to conduct a public hearing on this matter at 10:00 a.m., Tuesday, March 19, 2024. The Board may consider the application for up to 42 days from the close of the Board hearing. Tabling of the request for a period not to exceed 35 days may also

occur if the applicant consents. Specified findings, stating the reason for decision, are required in taking action on the proposed amendments.

The Board will consider all the testimony in the matter and may take action to:

1. Approve the application;
2. Deny the application; or
3. Modify the application.

All testimony and evidence must be directed toward the applicable decision criteria including applicable criteria in the plan or other land use regulations. Failure to raise an issue before the close of the record, or failure to provide statements or evidence sufficient to afford the decision maker(s) and the parties an adequate opportunity to respond to each raised issue precludes an appeal based on that issue.

Prior to the conclusion of the initial evidentiary hearing, any participant may request an opportunity to present additional evidence or testimony regarding the application. The Board hearing, which is scheduled for a date and time certain at 10:00 a.m., Tuesday, March 19, 2024, in the Board Hearing Room, Room 200, on the second floor of the Linn County Courthouse, is at least seven days from the initial Commission hearing and provides adequate opportunity to present additional evidence and testimony for the record.

If additional documents or evidence are provided by any party at the Board hearing, the Board may allow a continuance or leave the record open to allow the parties a reasonable opportunity to respond.

If additional documents or evidence are provided by any party, the Commission may allow a continuance or leave the record open to allow the parties a reasonable opportunity to respond. The 150-day time limitations described in ORS 215.427 apply to the proposed Zoning Map amendment.

Prior to the conclusion of the initial evidentiary hearing, any participant may request an opportunity to present additional evidence or testimony regarding the application. Because the Board will conduct a second evidentiary hearing 30 days after the Commission hearing, the Commission may grant the request or may conclude the hearing and forward the matter to the Board, thus satisfying the request for an opportunity to present additional evidence or testimony. If the matter is not forwarded to the Board, the Commission shall grant the request by either (a) continuing the public hearing or (b) leaving the record open for additional written evidence or testimony. If the Commission grants a continuance, the hearing shall be continued to a date, time and place certain at least seven days from the initial hearing.
